Professional Summary

Full Stack Web Developer focuses on building modern web applications using React, Node.js, Express, PHP, Laravel, and PostgreSQL. Passionate about developing scalable software solutions that solve real business problems through RESTful APIs and maintainable architecture.

Currently expanding my expertise by developing SaaS applications focused on logistics, business management, and operations management. Seeking my first professional opportunity as a Full Stack Developer where I can contribute, learn, and grow while building high-quality software.

Technical Skills

Frontend

- HTML5
- CSS3
- JavaScript (ES6+)
- TypeScript
- React
- Vite
- Tailwind CSS
- Bootstrap

Backend

- Node.js
- Express.js
- PHP
- Laravel
- REST APIs
- JWT Authentication
- MVC Architecture

Databases

- PostgreSQL
- MySQL

Software Testing

- Manual Testing
- Test Case Design
- Test Automation
- API Testing
- Functional Testing
- Integration Testing
- UI Testing

Testing Tools

- Postman
- Playwright
- Cypress
- Puppeteer
- React Testing Library

DevOps & Tools

- Docker

- Docker Compose
- Git
- GitHub
- Visual Studio Code

Other

- Linux
 - Command Line Interface (CLI)
-

Featured Projects

Logistics Suite

React • TypeScript • Node.js • Express • PostgreSQL • Docker

SaaS platform designed for logistics companies to manage orders, inventory, vehicles, drivers, and daily operations through a scalable client-server architecture powered by REST APIs.

Key Features

- JWT Authentication
 - Dashboard
 - Fleet Management
 - Inventory Management
 - Warehouse Management
 - Order Management
 - Reports
 - Docker Deployment
-

DentalFlow

React • TypeScript • Laravel • PostgreSQL • Docker

Dental clinic management system inspired by real operational needs observed during my professional experience. The platform centralizes patient management, appointments, medical records, treatments, and scheduling.

Key Features

- Patient Management
 - Appointment Scheduling
 - Treatment Management
 - Medical Records
 - Role-Based Access Control
 - Dashboard
 - REST API
-

MaintenanceHub

React • TypeScript • Laravel • PostgreSQL • Docker

Maintenance management platform built for companies that operate machinery, vehicles, and industrial equipment. It streamlines preventive and corrective maintenance planning through a centralized management system.

Key Features

- Asset Management
- Machinery & Vehicle Management
- Work Orders
- Preventive Maintenance
- Maintenance Calendar
- Spare Parts Inventory
- Reports
- Notifications
- REST API

- Docker Deployment
-

Professional Experience

IT Technician

Clínica Dental Maipú

Santiago, Chile

November 2023 – September 2025

- Provided technical support and maintenance for internal systems used in daily clinic operations.
 - Automated administrative processes to improve operational efficiency.
 - Diagnosed and resolved technical issues involving hardware, software, and infrastructure.
 - Collaborated on functional improvements to optimize internal business processes.
-

Network & Telecommunications Support

GTD

Santiago, Chile

2025

- Monitored production systems and network services.
 - Analyzed technical incidents and infrastructure issues.
 - Supported operational continuity through troubleshooting and system monitoring.
-

Education

Bachelor's Degree in Computer Engineering (*In Progress*)

AIEP

2025 – Present

Network Connectivity Technician (*In Progress*)

IP Chile

2026 – Present

Telecommunications Technician

Colegio Piamarta TP

2019 – 2021

Certifications

- Generation Chile — Java Full Stack Developer Bootcamp
 - Talento Digital para Chile (SENCE) — JavaScript Full Stack Developer Bootcamp
 - Google IT Automation with Python (Coursera)
 - Linux Essentials
-

Languages

- **Spanish:** Native
- **English:** B2 (Technical reading, documentation, and professional communication)
